PROFESSIONAL EXPERIENCE

Software Engineer II

Sept 2022 - Present

Carelon Global Solutions | Gurugram

- Architected and deployed secure and scalable cloud infrastructures on AWS and GCP while aligning with U.S. healthcare compliance standards.
- Automated infrastructure provisioning using Terraform, Ansible, and CloudFormation, reducing manual operational effort by approximately 60%.
- Developed and maintained CI/CD pipelines using Jenkins, GitLab CI/CD, and GitHub Actions, accelerating release cycles by nearly 40%.
- Containerized and orchestrated applications using Docker, Kubernetes, and Helm, ensuring high availability and resilient deployments.
- Integrated MLOps workflows using SageMaker and MLflow, enabling automated model training, deployment, and retraining pipelines.
- Strengthened system observability by implementing monitoring solutions using Prometheus, Grafana, Datadog, and CloudWatch, lowering MTTR by about 25%.
- Collaborated with distributed engineering teams to deliver secure, cost-optimized, and cloud-native solutions for healthcare and insurance platforms.
- Led onboarding initiatives for both new and legacy applications onto AWS and GCP landing zones while supporting enterprise-wide legacy infrastructure decommissioning.

TECHNICAL SKILLS

Cloud: AWS (EC2, S3, EKS/ECS, RDS, Lambda, Glue, EMR, Athena, Redshift, IAM, CloudFormation, Step Functions, API Gateway, SageMaker, Forecast), GCP (BigQuery, GKE, VM, Pub/Sub), Azure (AKS, Data Factory, Monitor)

DevOps & Automation: Terraform, CloudFormation, Artifactory, JFrog, Docker, Kubernetes, Helm

Programming & Scripting: Python, Bash, Shell Scripting, SQL, Java (Basics)

Infrastructure & Security: IAM, Secrets Manager, Certificate Management, HashiCorp Vault

CI/CD & Version Control: Git, GitHub, GitHub Actions, GitLab CI/CD, Bitbucket, Jenkins, Bamboo, Tekton, ArgoCD

MLOps: SageMaker, MLflow, Amazon Forecast, Vertex AI, Dialogflow

Project Management & Monitoring: JIRA, CloudWatch, Prometheus, Grafana, Datadog

Other Tools: Pandas, NumPy, Jupyter, FastAPI, React, Power BI, Agile/Scrum

Operating Systems: Linux, Windows

EDUCATION

Bachelor of Technology - Computer Science & Engineering

2018 - 2022

Technocrats Institute of Technology | Bhopal

KEY ACHIEVEMENTS

- Jury Award – 4th Position, EDA Hackathon 2025.
- Received four IMPACT Recognition Awards for contributions to Snowflake and RDS migrations, EMR optimization, Terraform automation triggers, and leadership in AEDL DevOps development and operational support.

HACKATHON & INITIATIVES

- Developed an AI-driven script redundancy detection platform using Snowflake Cortex embeddings and LLMs (Claude, Llama) to compare application logic with framework libraries, storing vectorized results and recommending reusable modules to reduce code duplication (EDA Hackathon 2025).
- Built a Generative AI proof-of-concept enabling users to retrieve database information through natural language prompts directly from a user interface (EDA Hackathon 2024).
- Created a voice-enabled AI assistant using Python and LLMs to automate more than 20 organizational tasks including messaging, email drafting, DevOps operations (secret retrieval, repository creation), and developer productivity assistance (EDA Hackathon 2024).

CERTIFICATIONS

- **AWS Certified Solutions Architect - Associate**

Mar 2026 – Mar 2029

Credential ID: [90374e1b-41ec-4d32-8374-466585a731d9](#)

- **Google Cloud Certified – Generative AI Leader**

Nov 2025 – Nov 2028

Credential ID: [8652b077-1f22-42d3-bfb7-7f5433d5115a](#)
